Good

The best University

Unnecessary bureaucracy and red tape/rules. Unorganized. Unnecessary classes.

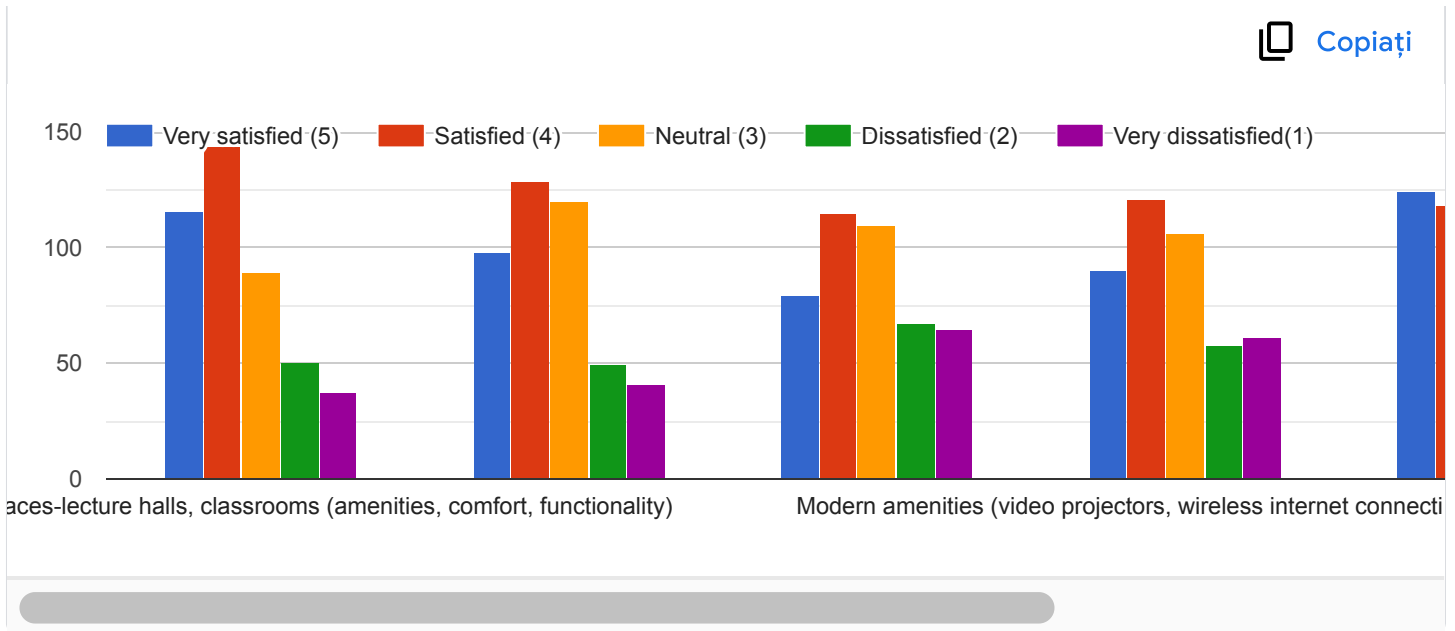

the university buldings and classes are too old ( for medicine university) !

Toilets!!!!!!!!!! Paper!!!!

the canteen food isn't as great wider range, toilets are atrocious and need a new design,there's not that much sport facilities and student unions or societies are completely not found in this University. Compared to other universities in Europe and there's no trips to there place if we are learning Romanian why shouldn't we go to museums, village or other neighbouring countries.

The teaching level is amazing but when you asked about the cantina and bathrooms I think it can go better and the sport we didn't have so no idea

B. Please evaluate your satisfaction level towards the following resources and educational amenities:

That's good

Library doesn't have the books I need

We need free wifi EVERYWHERE !!

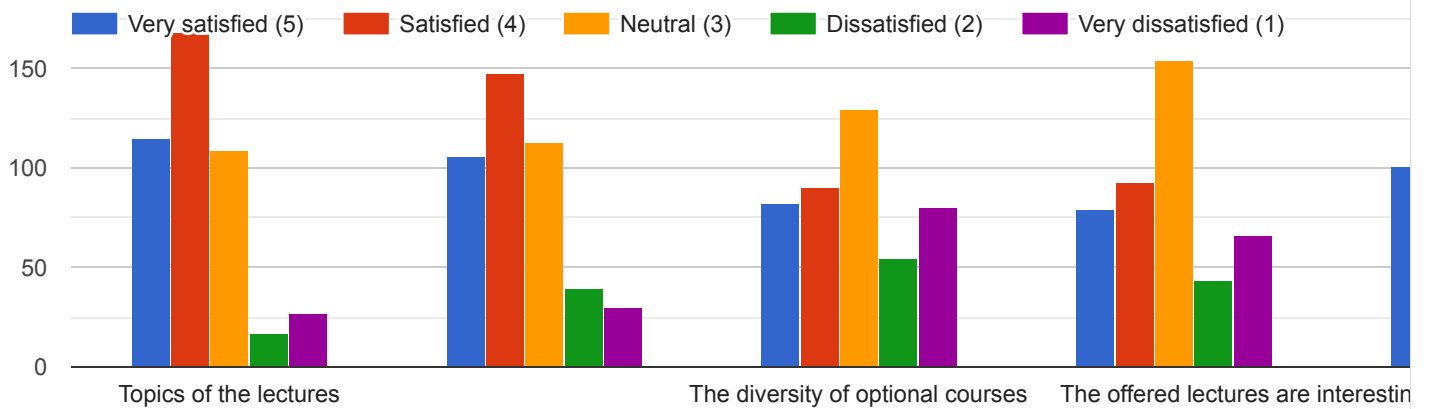

Glad to see Training programmes in English are introduced. More and more programmes if arranged on a monthly basis (in English) would boost student knowledge and satisfaction. Thanking you

More book in library! No internet in the university.....

Some classrooms really need to be updated with AC or heating lets take the anatomy building room 6 is so small and hardly any oxygen we should really take consideration of the student and professor who are constantly in the class. Also some subjects such as clinical anatomy there are no cadavers to dissect which makes it much easier to remember but instead we have a text book and a teacher who wants us to swallow the book inside out then when we do that ask questions as if we are surgeons. Now mind you I know some people who want to be surgeons but I however do not so why should I be forced to study this. Lastly please more clinical practice by the time I leave I don't think I will know how to take

### C. Please evaluate your satisfaction level towards the study programme and curriculum of "Nicolae Testemitanu" SUMP

All exams in same week, especially the concluding tests. All exam together not easy to score in all exam.

there is exams like physiology semi-final doesnt relate to the material that we are learning

More lectures like in Genetics. Less reading from the computer. More explaining and discuss

again optional course is the last thing on a students mind who has 4 exams or classes chasing after him, so less of that.As I said before more practice less subjects which are not important. Also why not make courses like physcology and communications like a month program honestly it will leave space to study and we can finish on time with good grade(food for thought).I would like to request more time on my schedule 8 am everyday is a pain I feel like i'm in elementary school.

Give the possibility to choose optional courses

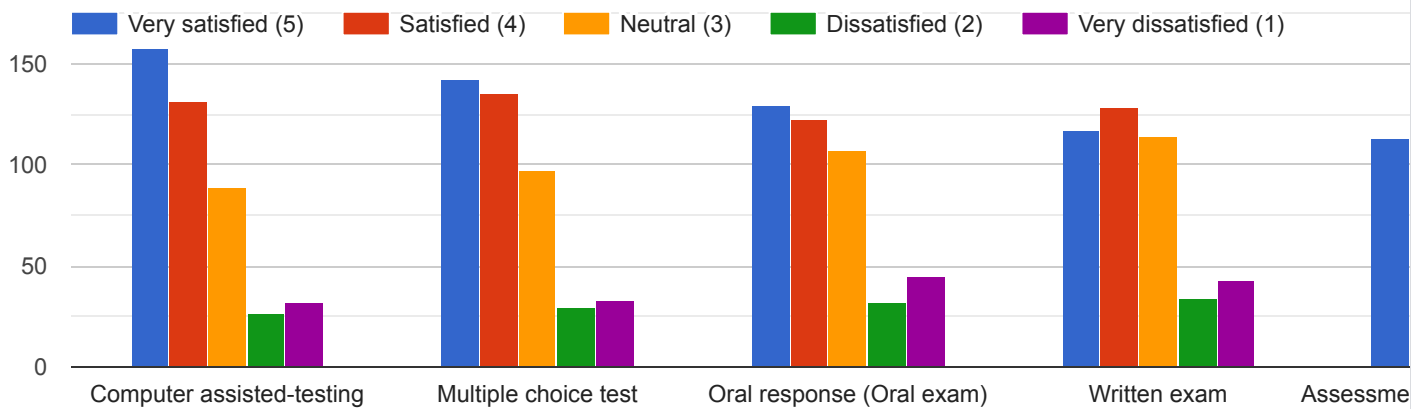

Publishing lectures subjects ahead of the lecture on the website.

There is a good website that belongs to the university that is not beind used to its full potential.

The problem with lectures is absents of students. And that happened because the university charge

D. Please evaluate your satisfaction level towards the final evaluation methods within "Nicolae Testemitanu" SUMPPh

Moodle question are confusing us more

I think you should motivate students to start there thesis early on at 2 nd year really helps with further career and makes you really enjoy the subjects and what do they always say lazy people find and easier way of doing things. Some oral exams are so biased and completely depending on the teachers mood which is sooo bad think about how someone didn't sleep for weeks on end to learn your topic but because you are moody or hate the person then you fail then. Completely unjust same for written I think we just have modulators like stand next to the teacher whilst doing the test or no name should be written just simu number so there is no bias, corruption or favouritism. Believe this might work.

The oral exams Depend on our teacher's mood not in our knowledge of the teacher is happy we will pass but if not we will fail this is not fair .So many people don't know anything and they pass because of favoritism, bias, and €€€€

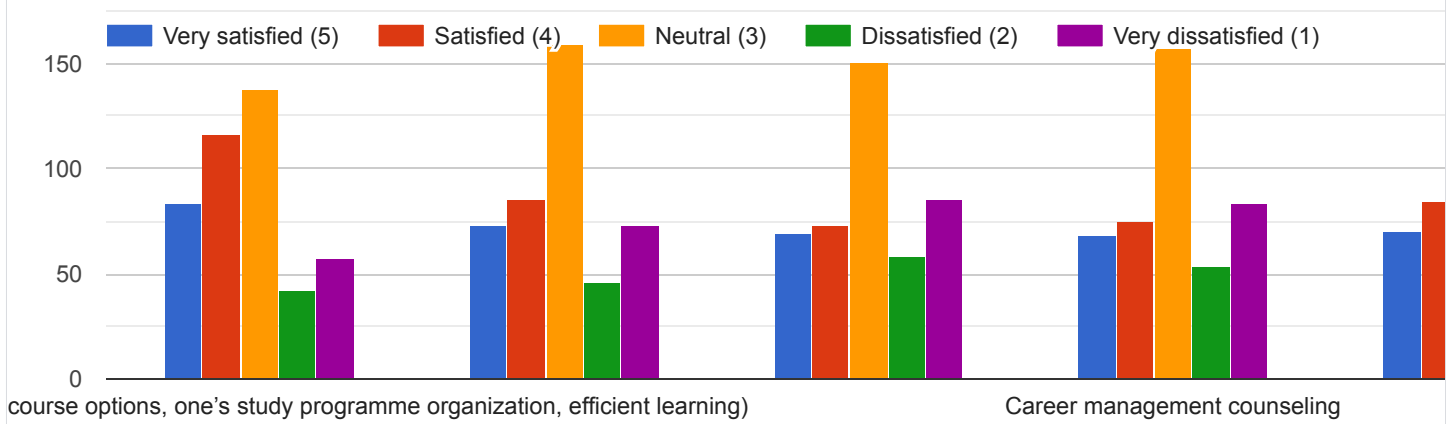

Should include more practical exams for example for physiology.

Also students should see patients more frequently for example we had pharma lesson last week in the hospital it was more interesting than usual thanks for the chief of department for that.

There are lots and lots of web problems on computer tests

E. Please evaluate your satisfaction level towards counseling services and professional/career guidance offered by the "Nicolae Testemitanu" SUMPh' s staff:

Extra curricular activities are not promoting our University.  
There is no other activities for students to improve their practical activities.

Why there is no any conferences or events for english students !

again little thought is ever considered on the student mental health instead absence is given and a grade.

Didnt even know that psychological counseling exist but i am going to put neutral because some doctors are usually doing a pretty good job in this manner for example doctor angela and igor.

Ever heard we have it in the university

.....

Thank you

The rules in the school are really unfair some of the materials they teach or false and not correct way the professors for the most part are amazing

Please structure the dental program like a USA dental school and provide students with patients so we can actually practice

To be completely honest for me the uni was the best decision I made I believe i'm a person who is very competitive and work well in that environment and for absence having to pay makes me come to class. But for others I wouldn't know. However, recommending this place sometimes is difficult because morally I don't agree in the way the teachers behave to students or the corruption present. Plus there are some people here who are just here for no reason. I think the uni should weed out the weak and people who are not here for medicine but playing however are passing at the same time how unusual compared to people who work there butts off. For this uni to become better and established for other foreign students then reduce the amount of people who can enter so easily without knowing where the liver is. Increase incentives to get higher grades like lowering tuition fees or bursary or placing the cover other face on every establishment. Really gets that healthy competition going

the last question summarizes all the problem, please try to be more open the feedback , otherwise things will never improve
